Task1

Zero-Shot Prompt

Few-Shot Prompt

Both zero-shot and few-shot got 10/10 correct (100%) on this test.

Approach	Accuracy
----------	----------

Zero-shot	100%
-----------	------

Few-shot	100%
----------	------

Takeaway: In this particular test, both approaches performed equally well because the 10 messages were fairly clear and unambiguous. Few-shot prompting still provides additional guidance by showing examples of exactly how the labels should be applied. On more complex or ambiguous customer messages, few-shot prompting would likely provide more consistent results.
